Clean and safe energy in refugee settings: Moving forward on the Clean Energy Challenge

*High-level event on private sector and government support to
refugees and host communities.*

*With opening address by UN High Commissioner for Refugees,
Filippo Grandi.*

Thursday 3 June 2021

16:00 - 17:45 Geneva

17:00 – 18.45 Addis Ababa

10:00 – 11:45 New York

Referring to key energy pledges made in the context of the Global Refugee Forum in 2019, the event will spotlight how clean energy projects are already transforming the lives of refugees and local populations, and present opportunities for further support. Together we will launch a Call to Action to anchor clean energy for refugees to the global climate agenda and contribute to the **High-level Dialogue on Energy in 2021**.
